RESEARCH AMERICA

AN ALLIANCE FOR DISCOVERIES IN HEALTH®

Your Partner in Research Advocacy

Research!America Adds Value for Our Members

- We are **one of the strongest and most widely respected voices** for medical research advocacy in Washington and across the nation.
- Research!America's chair, board of directors, president and top staff engage in extensive outreach to policy makers and national scientific and medical research leaders.
- Research!America provides **unique, proven advocacy tools**, such as public opinion poll data and local, national and global economic investment reports, on a timely, updated basis.
- We are regularly sought out by key media and are the **"go-to" source for information on research advocacy and policy.**
- We are **pioneering outreach to the next generation** of medical and scientific leaders by offering training in and encouraging involvement in advocacy and public service.

About Research, Advocacy and Research!America

Speaker Nancy
Pelosi

"Doubling the NIH budget was not possible without **Research!America**. Our inside maneuvering relied on your outside mobilization." —Speaker Nancy Pelosi (CA)

Research!America was named the "clearest voice clamoring for increased funding at government life science agencies" by *The Scientist*.

"There is no better investment than science research to conquer the maladies of the world. ... The potential for science research is absolutely limitless."
—Sen. Arlen Specter (PA)

The Society for Neuroscience has called **Research!America** "the leading coalition aiming to make medical research a higher national priority."

Rep. Rush Holt

"We still have a lot of work to do on the Hill to make sure research is not a side show or an afterthought. Global health research is central to all the work we deal with and is not just the purview of the science committee but should be just as important to foreign relations committees." —Rep. Rush Holt (NJ)

"Everybody in the science and technology community who cares about the future of the world should be tithing 10% of his or her time to interacting with the public in the policy process." —John Holdren, President Obama's science adviser

"There are four words that describe the domestic agenda in this country, and those words are science, science, science and science." —Speaker Nancy Pelosi (CA)

"The stimulus package did great things for life and physical science research, but none of the stimulus money increases the agency base lines. My bottom line is don't let up! Let's all work together to make science and technology a high priority." —The Honorable John Edward Porter, **Research!America** chair

Sen. Arlen Specter

The Hon. John
Edward Porter
